Precautions for fire-fighters:	Wear Self-Contained Breathing Apparatus (SCBA) operated in positive pressure mode and full protective clothing to prevent exposure to vapours or fumes.

6. Accidental release measures

Emergency procedures: Wear personal protection equipment and clothing to minimise exposure. Contain spill. If unable to recover liquid, absorb with an inert absorbent material. Collect and place in labelled container that can be sealed before disposal.

7. Handling and storage

Precautions for Safe Handling: Read label before use. Avoid contact with skin or eyes. Wear gloves to minimise exposure. Do not eat, drink or smoke when using. Chemical Stability: Stable under normal conditions of storage and handling.

Conditions to avoid: Extremes of temperature and direct sunlight.

Incompatible materials: Contact with galvanized steel or unlined mild steel which may produce hydrogen, a highly flammable gas.

Hazardous decomposition products: Thermal decomposition may produce toxic or irritating fumes and gases; may include carbon oxides, phosphorous oxides and nitrogen oxides.

11. Toxicological information

Ingestion: May irritate gastric tract and cause nausea and vomiting.

Inhalation: No specific effects identified.

Eye Contact: May be slightly irritating by direct contact.

Skin Contact: May be slightly irritating.

Other Health Effects: Product is not identified as sensitizer, mutagen, carcinogen, or with adverse effects on fertility or unborn child, nor to organs or systems.

Toxicological Information: Not available for product.

12. Ecological information

Ecotoxicity: This product is harmful to aquatic life.

Persistence and degradability: Absorption studies indicate that glyphosate has very low mobility. Average field half-life of glyphosate is 47 days.

Mobility: Glyphosate is strongly absorbed by soil and therefore becomes practically immobile. Microbial degradation is the major cause of loss from soil with liberation of carbon dioxide.

Bioaccumulation: Glyphosate is not bio-accumulative.
